**A library Management Platform, with a portal and Internet information center.**

**An innovative Multilanguage data base for libraries (including library networks), archives, museums and companies.**

-  A cloud based platform, no need to purchase servers.
-  Design and contents that meet the needs of the organization.
-  Improved customer service – Enhanced catalog search, home reservations, capability to enlarge the circulation of items and an advanced notification mechanism.
-  Improvement of cataloguing and other working processes, an advanced and friendly management interface.
-  The system is simple and can be accessed through a standard web browser. The implementation and training are easy and no need of extensive knowledge in computers.
-  A built in Sticker Generator.

-  Advanced searching capabilities in local and global catalogs.
-  Supports any kind of material (including digital).
-  Ability of integration with 3rd party suppliers (Barcode, SMS, RFID).
-  A proven knowledge how to migrate data from other LMS platforms.
-  Relatively low procurement and maintenance costs.
-  Competitive technical support and personalized customer service.

**Over 350 libraries are already working with us.**
